

WARN Works PullzAll Truck Crane

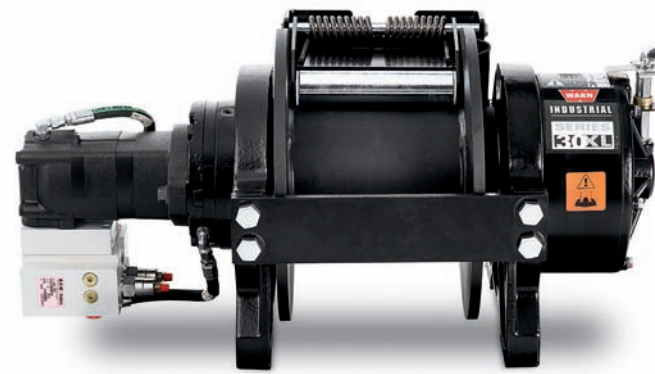

The WARN Works® PullzAll Truck Crane is unlike any other on the market: It includes a cordless WARN Works PullzAll™, and allows you to lift up to 1,000 lbs. into the bed of a truck with ease and precision, without removing the tailgate.

The WARN Works crane not only rotates, it articulates thanks to a powerful hydraulic ram. This means increased agility and outstanding versatility. The crane has a small footprint leaving plenty of space in a truck's bed. It also disassembles when not in use, allowing for even more usable bed space. So whether you're loading a pallet of bricks for building, a spare axle for your project vehicle, or an ATV for a day on the trails, the WARN Works Truck Crane makes loading your vehicle easier than ever. **PN 77600**

WARN Works 3700 DC Utility Winch

The redesigned 3700 DC utility winch has heavy-duty power, which makes it ideally suited for work sites. It's the perfect pulling tool for loading trailers, too. Rugged by design, the ultra-reliable 3700 makes a great addition to any workforce, pulling up to 3,700 lbs.

WARN Industrial Series 30XL Hydraulic Winch

The new WARN Series 30XL Hydraulic has a goliath 30,000 lb. pulling capacity—the highest of any WARN winch ever. Designed for use on wreckers and trailers, the Series 30XL is made from cast iron and features a powerful 12.0 cubic-inch Eaton hydraulic motor. Other features include a two-stage planetary geartrain, a spring-applied brake that will hold the full rated load, and a wire rope capacity of 142'.

PN 77880 (Standard drum, manual clutch. Available in a variety of other configurations.)

2008 NEW PRODUCTS

For 2008—our 60th year in business—**WARN®** has released several exciting new products that will help you get more done on the trail, or on the job.

Endurance 12.0 Forced-Air-Cooled Winch

More power. More speed. More endurance. This is no ordinary winch: This is the WARN® Endurance 12.0. This winch gives you 12,000 lbs. of pulling capacity with an increased duty cycle—the secret is its innovative cooling system.

Here's how it works: The specially designed cooling fan (which is mounted under the vehicle's hood) automatically turns on when the winch's motor

reaches a certain temperature. The fan forces air through a hose and directly into the winch's motor housing, cooling the motor. The air then flows out of the motor housing via a second hose and is discharged.

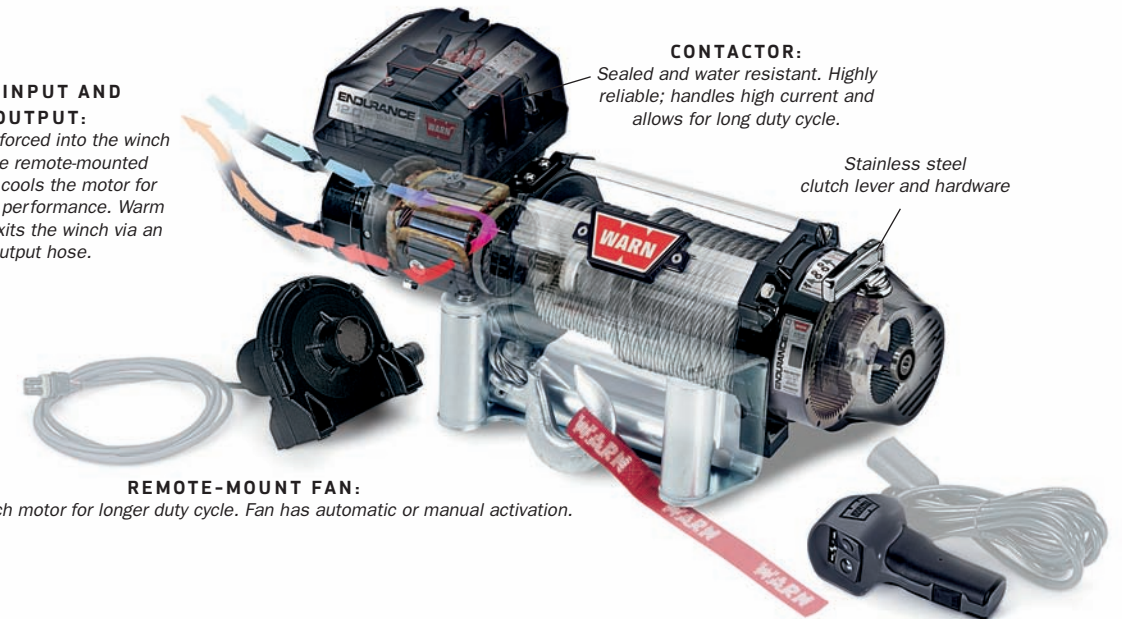

When you want a winch that'll really go the distance, you want a winch with serious endurance: The WARN Endurance 12.0 **PN 73010**

AIR INPUT AND OUTPUT:
Cool air is forced into the winch using the remote-mounted fan. This cools the motor for increased performance. Warm air then exits the winch via an output hose.

CONTACTOR:
Sealed and water resistant. Highly reliable; handles high current and allows for long duty cycle.

Stainless steel clutch lever and hardware

REMOTE-MOUNT FAN:
Cools winch motor for longer duty cycle. Fan has automatic or manual activation.

Gen II Trans4mer system, complete with all options.

WARN Gen II Trans4mer® mounting system

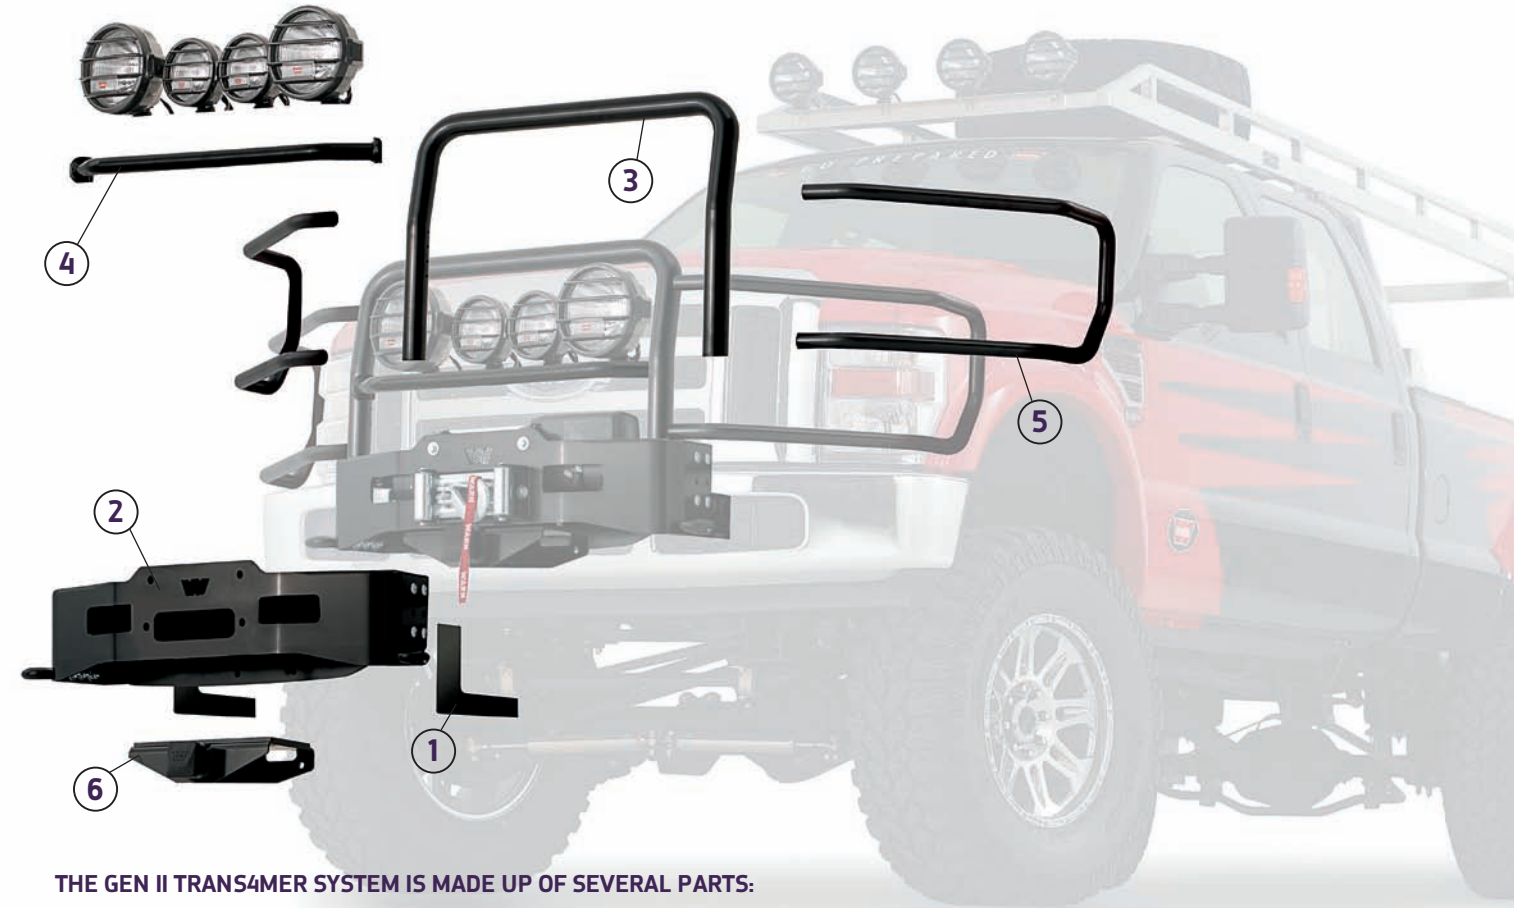

The newly engineered winch tray bolts directly to your vehicle's frame, making it easier than ever to mount a winch to a vehicle. Now, whether you simply need a strong, durable place to mount your WARN winch, or you want the top-of-the line system with headlamp guards, grille guard, light bar, and front receiver, the WARN Gen II Trans4mer system is more accessible, durable, and versatile than ever before.

Gen II Trans4mer Base Kit, with 16.5ti winch (base kit includes winch tray and mounting brackets).

Base Kit with lights mounted to winch tray (light mounting brackets are included with tray). Grille Guard and Headlamp Guards added for extra front end protection.

THE GEN II TRANS4MER SYSTEM IS MADE UP OF SEVERAL PARTS:

BASE KIT

This group of parts features the minimum amount of components needed to attach the Gen II Trans4mer to your vehicle. It allows you to mount either a WARN winch or up to four WARN lights on your truck. The Base Kit includes the following parts:

- ① **Mounting Brackets**
 - Attaches to the system to the vehicle
 - Vehicle-specific application
- ② **Winch Tray**
 - Allows you to mount a WARN winch
 - Available for mid-frame or large-frame winches
 - Includes tow hooks
 - Black or stainless steel finish
 - Includes optional Light Mounting Bracket, allowing you to mount up to four WARN lights instead of a winch. Note: Light mounting bracket cannot be used with winch

OPTIONAL GEN II TRANS4MER PARTS

These optional parts can be added to the Base Kit, and allows you to get the most out of the Gen II Trans4mer.

- ③ **Grille Guard**
 - Gives you extra protection to your vehicle's grille area
 - Allows you to mount other optional parts
 - Vehicle-specific application
 - Available in black or stainless steel finish
- ④ **Light Mounting Bar**
 - Lets you use up to four WARN lights with a WARN winch
 - Attaches to the Grille Guard; has three different mounting positions
 - Vehicle-specific application
 - Available in black or stainless steel finish
- ⑤ **Headlamp Guards**
 - Protects the area around your vehicle's headlamps
 - Attaches to Grille Guard
 - Available in black or stainless steel finish
- ⑥ **Receiver Bracket**
 - Class III, 2" receiver for the front of a vehicle.
 - For use with WARN Multi-Mount system or receiver shackle
 - Universal fit
 - Black finish only

Now available for the 2008-09 Ford Super Duty and '09 F-150.
